

Statement: FUCHS LUBCON® Products Affixed With Anti-counterfeiting Labels

Dear Customers:

Thank you for your long-term trust and support for FUCHS LUBCON® products and technologies.

In 2024, LUBCON® officially joined the FUCHS Group. As a high-end specialty lubricant product line under FUCHS brand, LUBCON® products are widely used in industries such as bearings, railways, textiles, medium-density fiberboard, corrugated paper, and film stretching, and have received widespread acclaim from customers.

Recently, we have discovered that some LUBCON® products purchased by customers are counterfeit. This not only causes huge losses to customers but also has an extremely serious negative impact on the product reputation and market image of FUCHS.

Therefore, we have decided that starting from May 1st, 2025, all FUCHS LUBCON® products manufactured or sold within China will be affixed with anti-counterfeiting labels to enable customers to verify the authenticity of the products.

The anti-counterfeiting label of FUCHS LUBCON® products consists of two layers: the outer purple label is the product logistics code, which is used for scanning in the logistics and distribution channels to trace the production information of the product. You can access the logistics code query platform through the WeChat official account "FUCHS Lubricants" - the menu "Quality Lubricants" - "Anti-counterfeiting Query" - "NYSE® & LUBCON® Products", enter the 16-digit number below the product logistics code, or directly scan the product logistics code to query.

The inner black-and-white label revealed after peeling off the outer label is the product anti-counterfeiting code. It can only be scanned by end customers (using the "Scan" function in WeChat). After scanning, the product information and scanning information will be displayed to verify the authenticity of the product. For details, please refer to the relevant posts on the WeChat official account "FUCHS Lubricants".
