

FUCHS Reliable Packaging

20L Mauser

FUCHS offer strong and reliable plastic 20L containers for optimum product security.

With our plastic packaging we understand your need for durable, impact-resistant, reliable packaging that delivers our high-performance products safely to end users.

This industry leading packaging is blow-molded plastic and features a useful side view strip, breather cap, pouring spout and integral ergonomic carry handle.

The high-density polyethylene meets up-to-date FDA and EU packaging requirements and are ideal for a variety of different industries.

UN- and DOT-approved without the need for an outer pack carton, our tight-head containers undergo rigorous testing before filling.

For added ease, we supply sturdy metal stands, suitable for housing 3 or 6 upright 20L containers. When fitted with a pouring tap, these stands are ideal for workshops and filling areas.
